

# CLOSE THE LOOP – WITH BIOBAGS

---

Compostable biobags are vital to closing the loop, as they get composted together with your food waste. Conventional plastic liners need to be removed before composting, but shreds often remain and can pollute farmers' fields. Switching from conventional plastic liners means rethinking your bin size, but it's the only way to truly Close the Loop.

- Certified home compostable
- Made responsibly in Europe from MaterBi, a plant material made from vegetable oils and thistle starch
- No soil contamination

**vegware**<sup>™</sup>  
CLOSE THE LOOP

code	product	w (mm)	l (mm)	microns	rolls/carton	cartons/pallet

VBL-80	80 litre compostable liner, roll 20	810	1040	17	12	56
VBL-140	140 litre compostable liner, roll 10	860	1300	17	20	56
VBL-240	240 litre compostable liner, roll 10	1130	1390	17	14	56

## RETHINKING YOUR BIN SIZES

- **It's not a straight swap** from your size of liner
- Pure food waste is heavy! Use smaller containers, up to maximum 30 litres. Rather than lifting full bags, tie the liner and tip the bin instead
- Used Vegware disposables in your waste makes for lighter bins, so 70 or 80 litre bags should be fine
- Our 140 and 240 litre liners are only for lining external wheelie bins
